PROJECT

Food Order Website | HTML, CSS, JavaScript, MongoDB, Visual Studio Code | [Github](#)

The Food-Order Project is a web application built using the MERN stack (MongoDB, Express, React, and Node.js). User Accounts: Allows 500+ users to create accounts, browse menus, and manage their orders. Real-Time Ordering: Users can add items to their cart and place orders in real-time, with over 100+ items available across various categories.

GHUB | (Python Django, HTML, CSS, and JavaScript) | Beginner Project | [Github](#)

GHub is a Django-based microblogging app where users post short messages with images. It supports user authentication, tweet management, and a structured feed. Built for scalability, it can be extended with features like likes and comments.
